

The experience you want... the compassion you deserve!

{slimbox align=|right| padding=|5| title=|Hazleton Imaging offers state-of-the-art diagnostic imaging services right in downtown Hazleton.| album=|aboutus|}images/stories/aboutus/exterior.jpg{/slimbox}The next time your doctor sends you for diagnostic testing – whether it’s an MRI, CT scan, mammogram, ultrasound or some other test – tell your doctor you want Hazleton Imaging Center where the difference is clear… as clear as our ultra sharp results.

Hazleton Imaging truly does provide “the experience you want and the compassion you deserve” with our home-like setting and state-of-the-art diagnostic equipment. But the real difference lies with our highly trained staff of technologists and our team of board-certified radiologists who have set the bar for excellence throughout Northeastern Pennsylvania.

Another noticeable difference can be found in the speed and accuracy of your test results. We believe it’s important that you and your doctor receive your results as soon as possible.

{slimbox align=|left| padding=|5| title=|Hazleton Imaging's experienced professionals will treat you with compassion in a warm, homelike setting.| album=|aboutus|}images/stories/services/ct1-3631.jpg{/slimbox}For these reasons, Hazleton Imaging has grown to become the area’s premier facility for imaging procedures, ranging from MRI and CT scans to nuclear medicine and cardiac stress tests. A Women’s Center provides mammography, bone densitometry and ultrasound tests in a private, comforting atmosphere.

Hazleton Imaging stays at the forefront of technology by offering the latest equipment, ensuring that you and your doctor receive the most accurate results possible.

Some of these technologies include the area’s only truly open MRI unit that accommodates claustrophobic patients, and a nuclear medicine department for nuclear and cardiac stress testing.

Recently, we’ve made having an MRI more relaxing by adding “Cinema Vision” goggles which allow you to watch television or a DVD with concert quality sound during your procedure.

We’ve added a computer aided detection (CAD) system to our traditional X-ray units to help in the early detection of lung cancer.

Fully accredited by the American College of Radiology, Hazleton Imaging’s board-certified radiologists and highly trained technicians are also committed to remaining on top of the latest advances in imaging.

And we want you to know that Hazleton Imaging is always going to be there when you need us. We have technicians and doctors on call 24 hours a day, seven days a week.

So, remember, the next time you need to schedule a diagnostic imaging procedure whether it’s an x-ray, CT scan, mammogram, ultrasound or an MRI, be sure to tell your doctor you want Hazleton Imaging Center. The experience you want… the compassion you deserve!
